

Peri-operative Care Guidelines

1. All patients undergoing elective, inpatient operative procedures¹ at Munson Medical Center will have the following items addressed by the surgeon boarding the case:
 - a. Calculation of Munson Surgical Risk Index (MSRI)
 - b. A complete Pre-operative Assessment (H&P) which must be available on EMR prior to surgery
 - c. Identification of the Physician/Group who will be responsible for inpatient medical management – this may be the surgeon, primary care physician, or hospitalist
2. The essential elements in the Pre-operative Assessment (H&P) have been approved by the Medical Executive Committee (MEC) and are outlined in Addendum 1.
3. The elements of the Munson Surgical Risk Index (MSRI) are outlined in Addendum 2
4. The surgeon has ultimate responsibility for calculating the MSRI.
5. The physician providing inpatient medical management must be available when the patient enters Post Anesthesia Care Unit (PACU)

¹ Does not presently include emergencies or outpatients (6/15/11)
